

CONTACT CLEANER

CONTACT CLEANER

USES

CONTACT CLEANER protects and insulates electrical components (circuits, contacts, batteries, etc.).

It removes all residue that may affect electrical contacts.

PROPERTIES & ADVANTAGES

- ▶ Efficient water repellency: quickly removes water and condensation residue.
- ▶ Protective action: excellent anti-corrosion properties (parts of marine equipment, corroded batteries, etc.).
- ▶ Penetrating oil: allows corners and hidden surfaces of parts to be reached.
- ▶ Dissolves and removes solid build-ups of dirt and grime.
- ▶ Efficient as preventive or curative treatment for difficult start-up caused by humidity.
- ▶ Ideal for providing protection in marine environments.

INSTRUCTIONS FOR USE

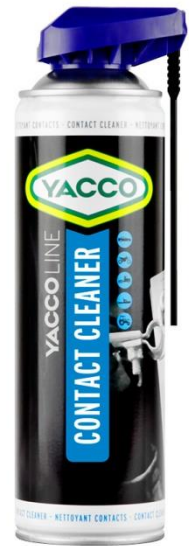

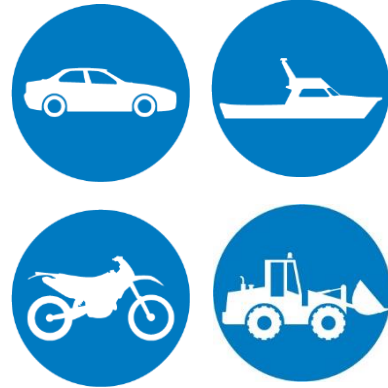

- ▶ Shake the aerosol.
- ▶ Spray on the parts to be treated.
- ▶ Let the product act for a few minutes.
- ▶ Repeat treatment if necessary.

PRECAUTIONS FOR USE

Before use, read the safety label on the packaging carefully and/or check the Health and Safety Sheet available at yacco.com.

Do not spray into live electrical compartments or on hot parts.
