

NETT FREINS RECHARGE PRO

Brake cleaner, professional refill

USES

Cleans and degreases the brake systems of cars, lorries, motorcycles and heavy-duty equipment (transportation, construction, agriculture).

PROPERTIES & ADVANTAGES

- ▶ Cleans and degreases all parts of the brake system (drums, discs, brake pads, cylinders, callipers) and all clutch components.
- ▶ Removes oil, grease, brake fluids and all stubborn dirt.
- ▶ Improves brake performance.
- ▶ Dries quickly and leaves no residue.
- ▶ Suitable for degreasing mechanical parts and electromechanical components.
- ▶ Economic and ecological 5 liters refill. Reduces the use of disposable aerosol sprays containing propellants.

INSTRUCTIONS FOR USE

Degreasing product in liquid form to be used with a spraying device suitable for handling solvents (hand sprayer, refillable aerosol...).

After testing, spray and leave the product to act for a few seconds.

Repeat as many times as necessary, depending on the scale of the cleaning.

Dry using compressed air or a cloth.

PRECAUTIONS FOR USE

Can be used in small quantities for soaking greasy parts but in a well-ventilated area as the product is very volatile and flammable.

Close the container tightly after use.

Due to its high flammability, the product is not suitable for use in degreasing fountains.

Before use, carefully read the safety information on the label of the product and check the instructions given on the Health and Safety Data Sheet available at yacco.com.
